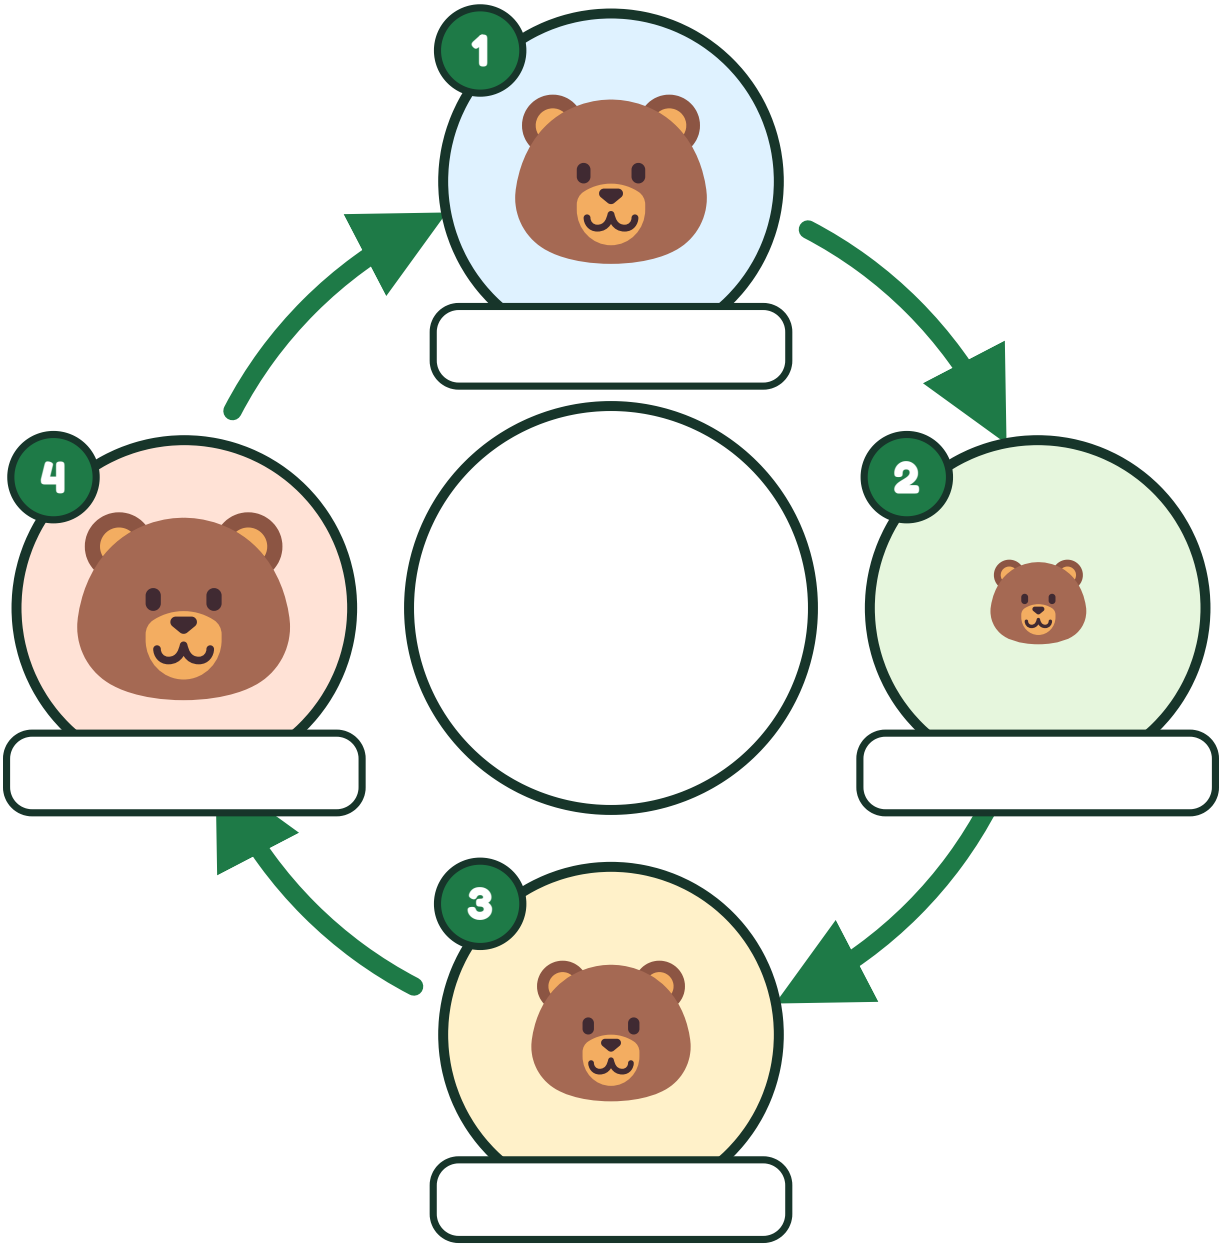
Label the Bear Life Cycle

Write the name of each stage in the empty boxes.

Name: _____ Date: _____



Word bank

Adult • Cub • Pregnancy • Yearling

Which stage comes right after **Pregnancy**? _____

Cut and Sequence

Cut out the cards and put the bear life cycle in order. ✂

Name: _____ Date: _____

Cub
Born in the winter den, under about 1 lb.

Pregnancy
Mates in summer; embryo implants in late fall.

Yearling
Stays with mom, then leaves at 1.5 to 3 years.

Adult
Lives alone; females have cubs every 2+ years.

Match the word to its meaning

1. cub ____	A. when an embryo waits months before it attaches and grows
2. yearling ____	B. a young bear in its second year of life
3. den ____	C. a baby bear
4. delayed implantation ____	D. a sheltered place where a bear spends the winter

Glue your cards in order on another sheet and draw arrows between them.
