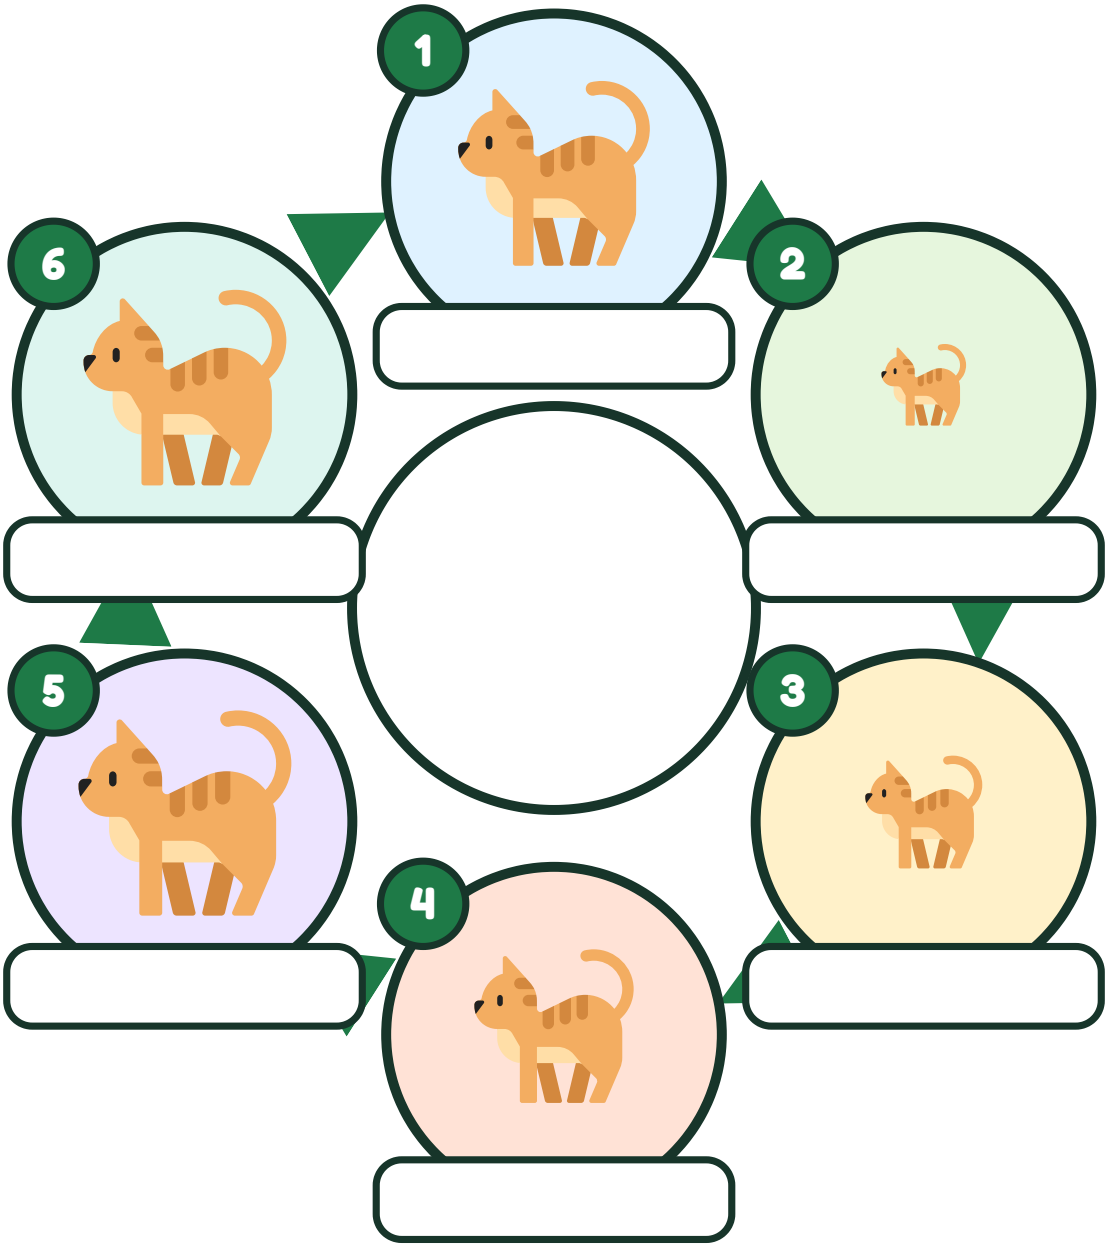
Label the Cat Life Cycle

Write the name of each stage in the empty boxes.

Name: _____ Date: _____



Word bank

Adult • Juvenile • Kitten • Newborn kitten • Pregnancy • Senior

Which stage comes right after **Pregnancy**? _____

Cut and Sequence

Cut out the cards and put the cat life cycle in order. ✂

Name: _____ Date: _____

Adult
From about 1 year; fully grown by 2 or so.

Senior
From about 10 years; slows down, needs care.

Newborn kitten
Eyes and ears closed; drinks only milk.

Kitten
Eyes open, plays and starts solid food.

Pregnancy
Mother cat is pregnant for about 9 weeks.

Juvenile
About 3–12 months; grows fast, can breed.

Match the word to its meaning

1. kitten ____	A. a male cat
2. queen ____	B. a group of kittens born to one mother at the same time
3. tom ____	C. a baby or young cat
4. litter ____	D. a female cat that can have kittens

Glue your cards in order on another sheet and draw arrows between them.
