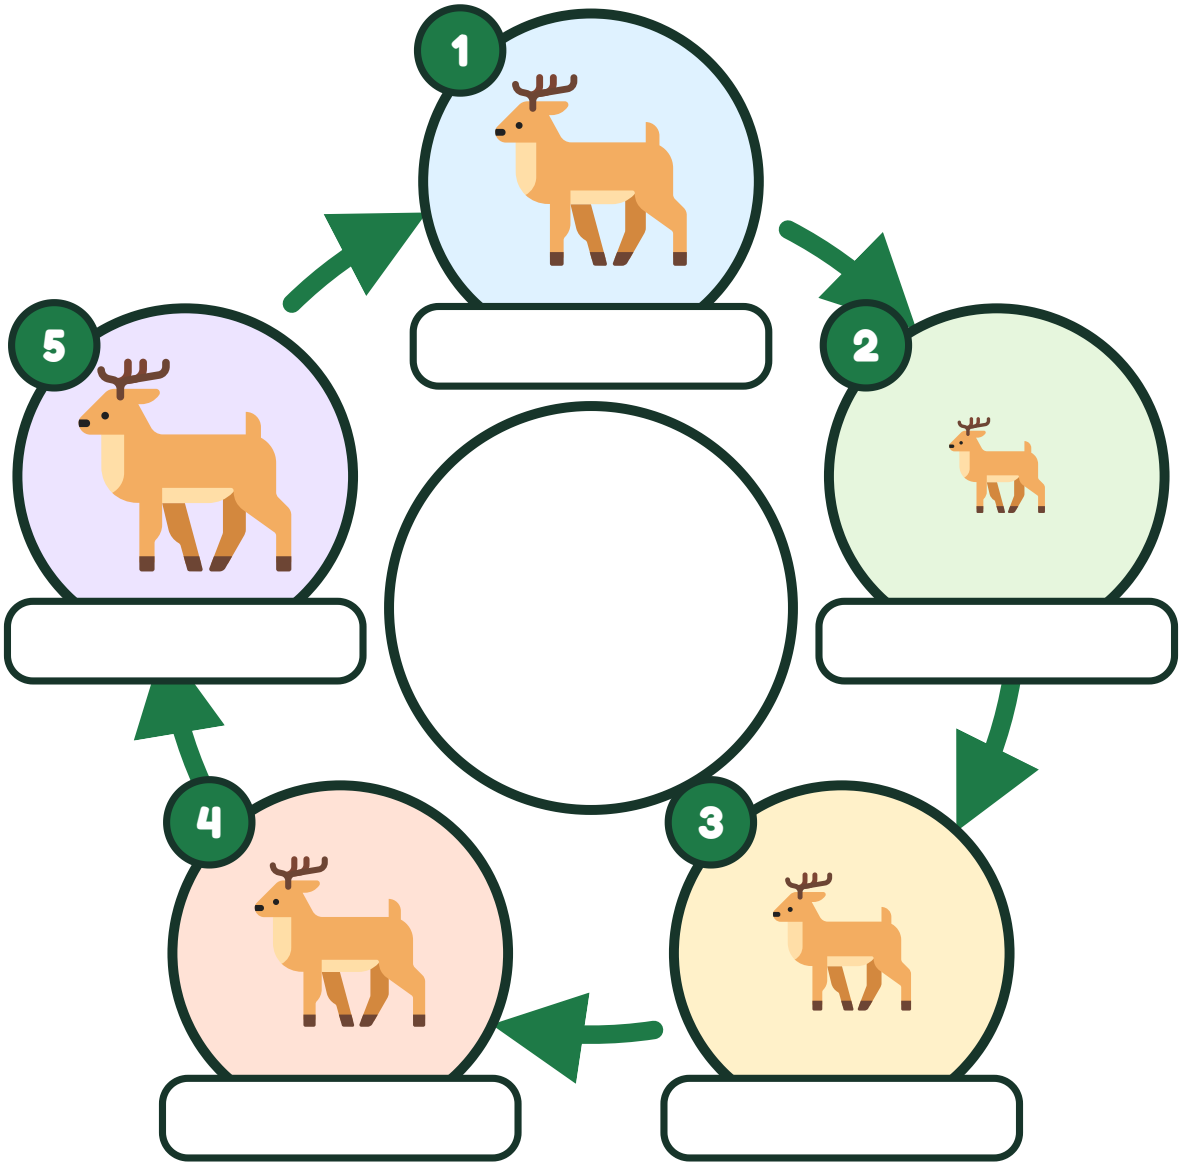
Label the Deer Life Cycle

Write the name of each stage in the empty boxes.

Name: _____ Date: _____



Word bank

Adult • Growing fawn • Newborn fawn • Pregnancy • Yearling

Which stage comes right after **Pregnancy**? _____

Cut and Sequence

Cut out the cards and put the deer life cycle in order. ✂

Name: _____ Date: _____

Pregnancy
Lasts about 200 days, from fall to late spring.

Adult
Bucks and does mate in the fall rut.

Yearling
About 1 year old; young bucks grow first antlers.

Growing fawn
Follows mom, eats plants, loses spots by fall.

Newborn fawn
Spotted fawn hides alone for about 3 weeks.

Match the word to its meaning

1. fawn ____	A. a male deer
2. doe ____	B. a female deer
3. buck ____	C. the fall season when deer mate
4. rut ____	D. a baby deer

Glue your cards in order on another sheet and draw arrows between them.
