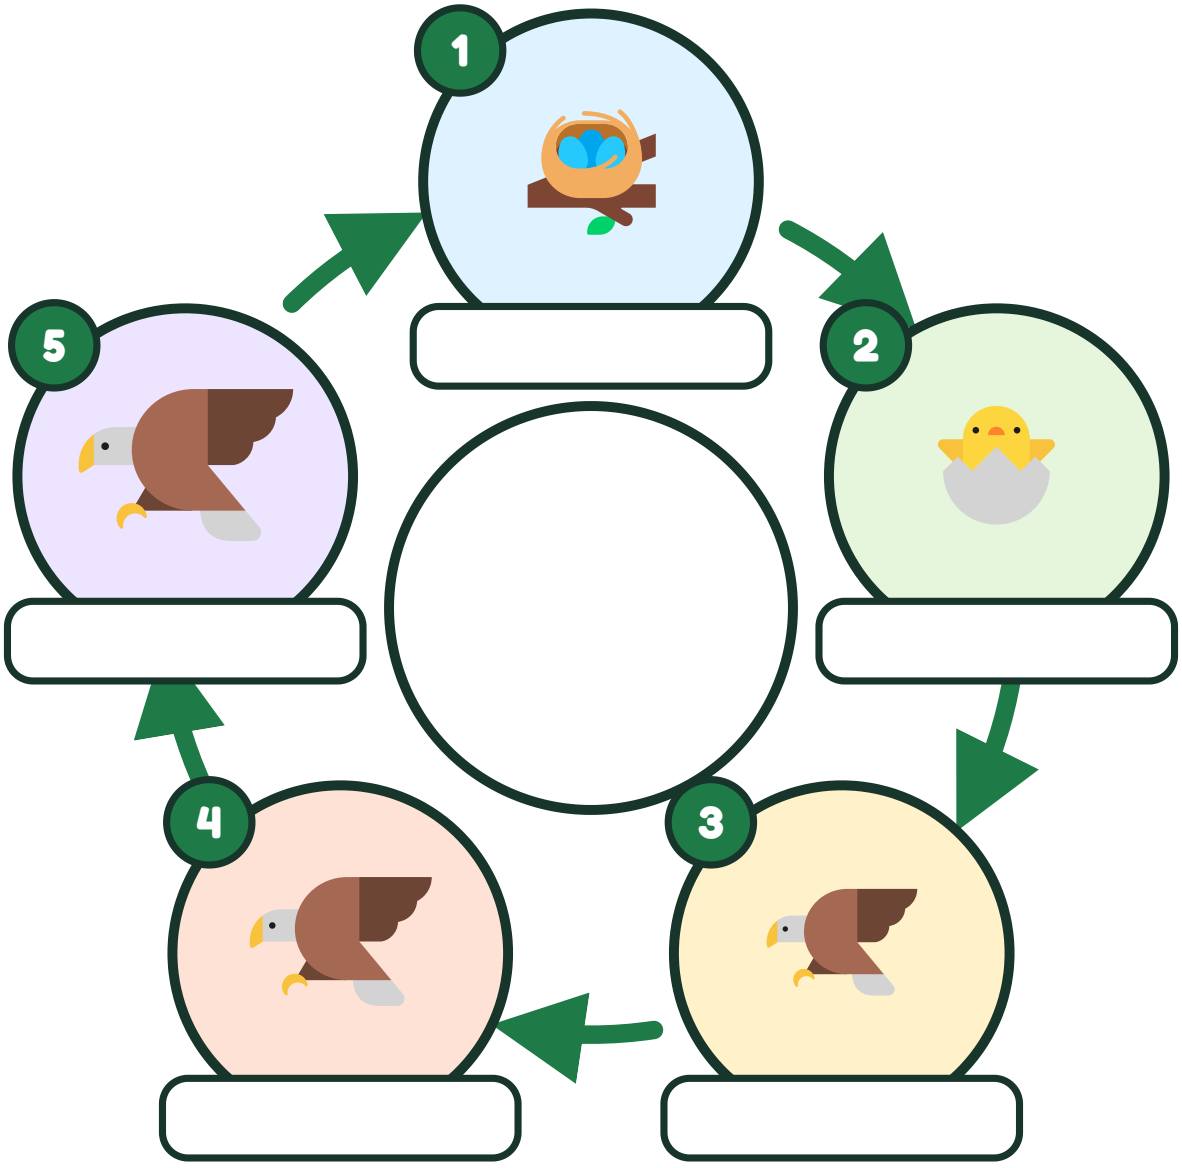
Label the Eagle Life Cycle

Write the name of each stage in the empty boxes.

Name: _____ Date: _____



Word bank

Adult • Eaglet • Egg • Fledgling • Juvenile

Which stage comes right after **Egg**? _____

Cut and Sequence

Cut out the cards and put the eagle life cycle in order. ✂

Name: _____ Date: _____

Egg
1 to 3 eggs, kept warm for about 35 days.

Fledgling
First flight at about 10 to 12 weeks old.

Eaglet
Fluffy gray nestling fed by both parents.

Adult
White head and tail; breeds from about 4–5.

Juvenile
Brown, mottled plumage for about 4 to 5 years.

Match the word to its meaning

1. eaglet ____	A. to keep eggs warm so they can hatch
2. incubate ____	B. to grow flight feathers and leave the nest
3. fledge ____	C. a baby eagle
4. plumage ____	D. a bird's feathers

Glue your cards in order on another sheet and draw arrows between them.
