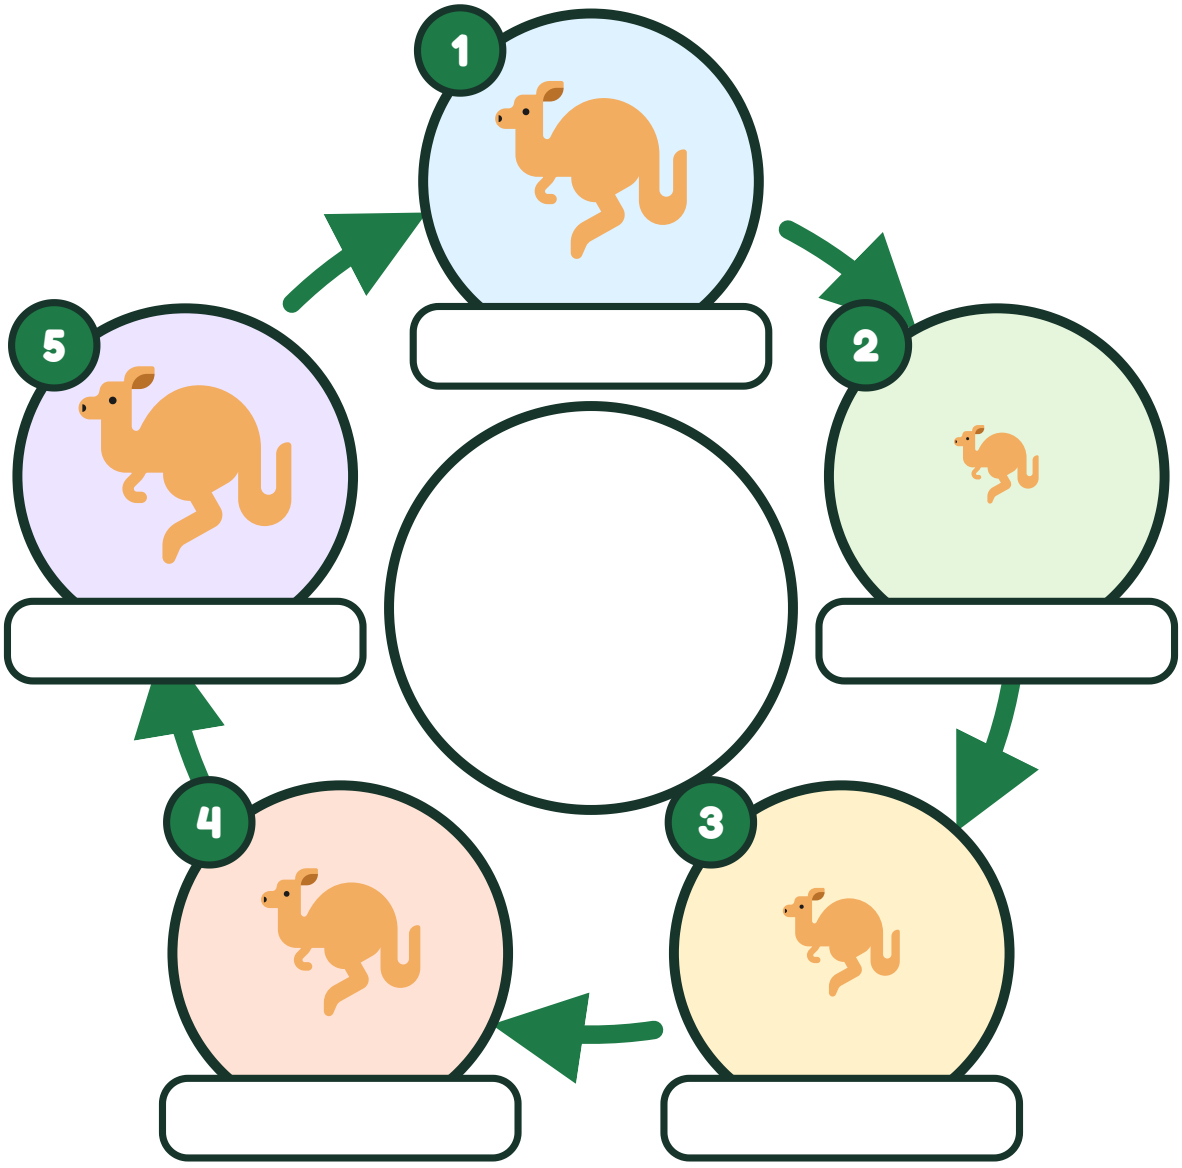
Label the Kangaroo Life Cycle

Write the name of each stage in the empty boxes.

Name: _____ Date: _____



Word bank

Adult • Newborn joey • Pouch joey • Pregnancy • Young-at-foot

Which stage comes right after **Pregnancy**? _____

Cut and Sequence

Cut out the cards and put the kangaroo life cycle in order. ✂

Name: _____ Date: _____

Pouch joey
Grows in the pouch for about 8 months.

Adult
Can breed from about 15 to 24 months old.

Pregnancy
Red kangaroo pregnancy lasts only about 33 days.

Newborn joey
Jellybean-sized baby crawls into the pouch.

Young-at-foot
Hops beside mom and drinks milk until about 1.

Match the word to its meaning

1. joey ____	A. a pocket of skin on a mother kangaroo's belly
2. marsupial ____	B. a joey that lives outside the pouch but still drinks milk
3. pouch ____	C. a baby kangaroo
4. young-at-foot ____	D. a mammal whose babies finish growing in a pouch

Glue your cards in order on another sheet and draw arrows between them.
