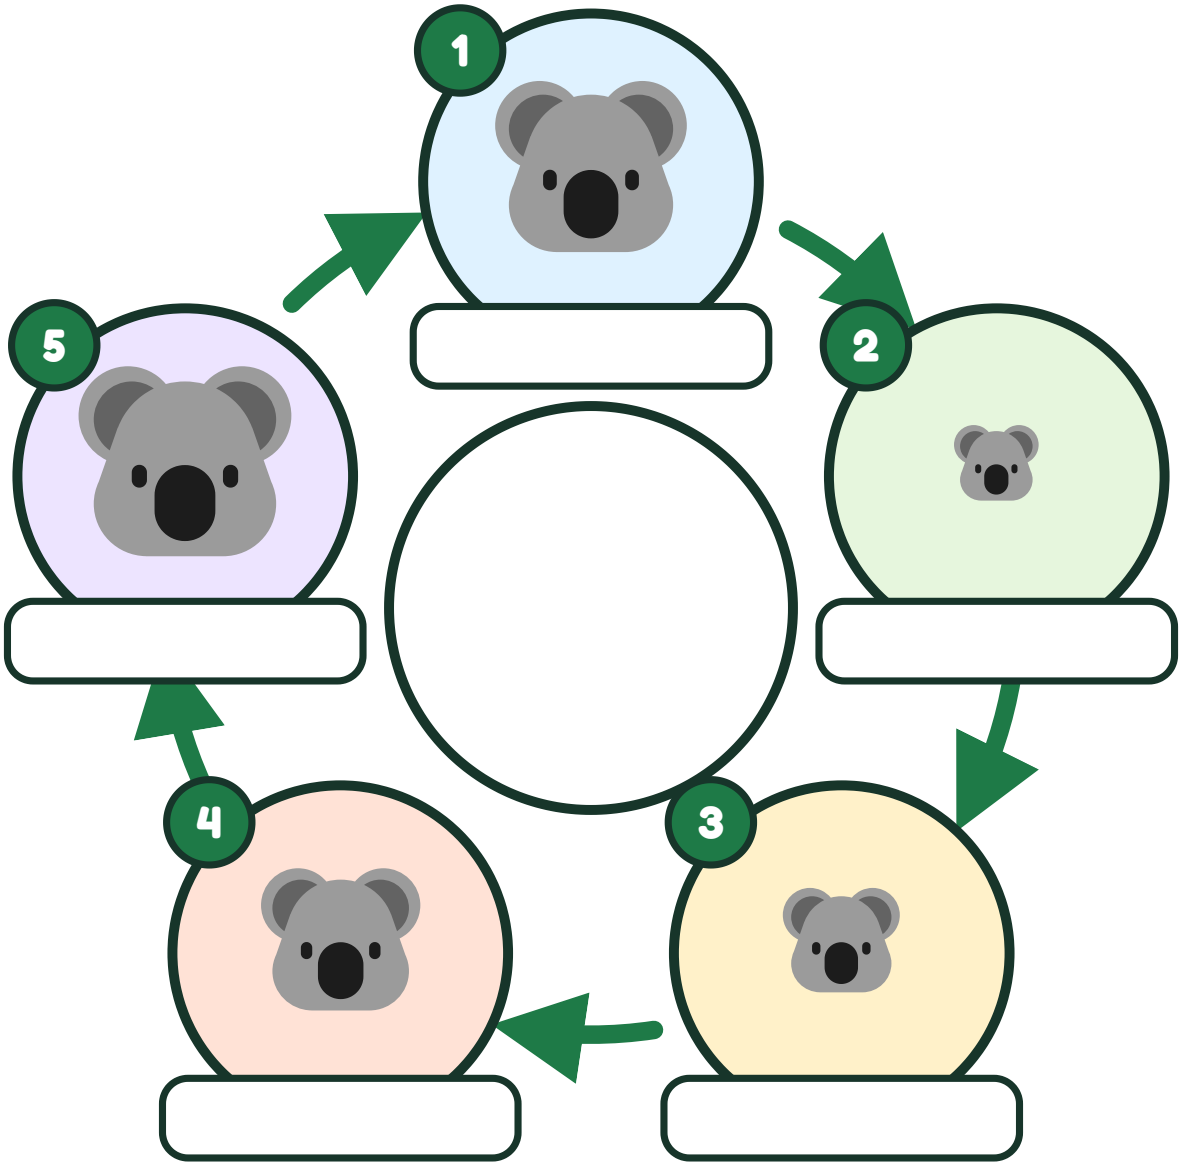
Label the Koala Life Cycle

Write the name of each stage in the empty boxes.

Name: _____ Date: _____



Word bank

Adult • Back-riding joey • Newborn joey • Pouch joey • Pregnancy

Which stage comes right after **Pregnancy**? _____

Cut and Sequence

Cut out the cards and put the koala life cycle in order. ✂

Name: _____ Date: _____

Adult
Females breed from about 2–3 years old.

Back-riding joey
Rides on mom's back and eats leaves to ~1 year.

Pregnancy
Lasts about 35 days, in summer.

Newborn joey
About 2 cm long; crawls into the pouch.

Pouch joey
Drinks milk in the pouch for about 6–7 months.

Match the word to its meaning

1. joey ____	A. a baby koala
2. marsupial ____	B. a mammal whose babies grow in a pouch
3. pap ____	C. a soft food from the mother that helps a joey learn to digest leaves
4. eucalyptus ____	D. trees whose leaves are the koala's main food

Glue your cards in order on another sheet and draw arrows between them.
