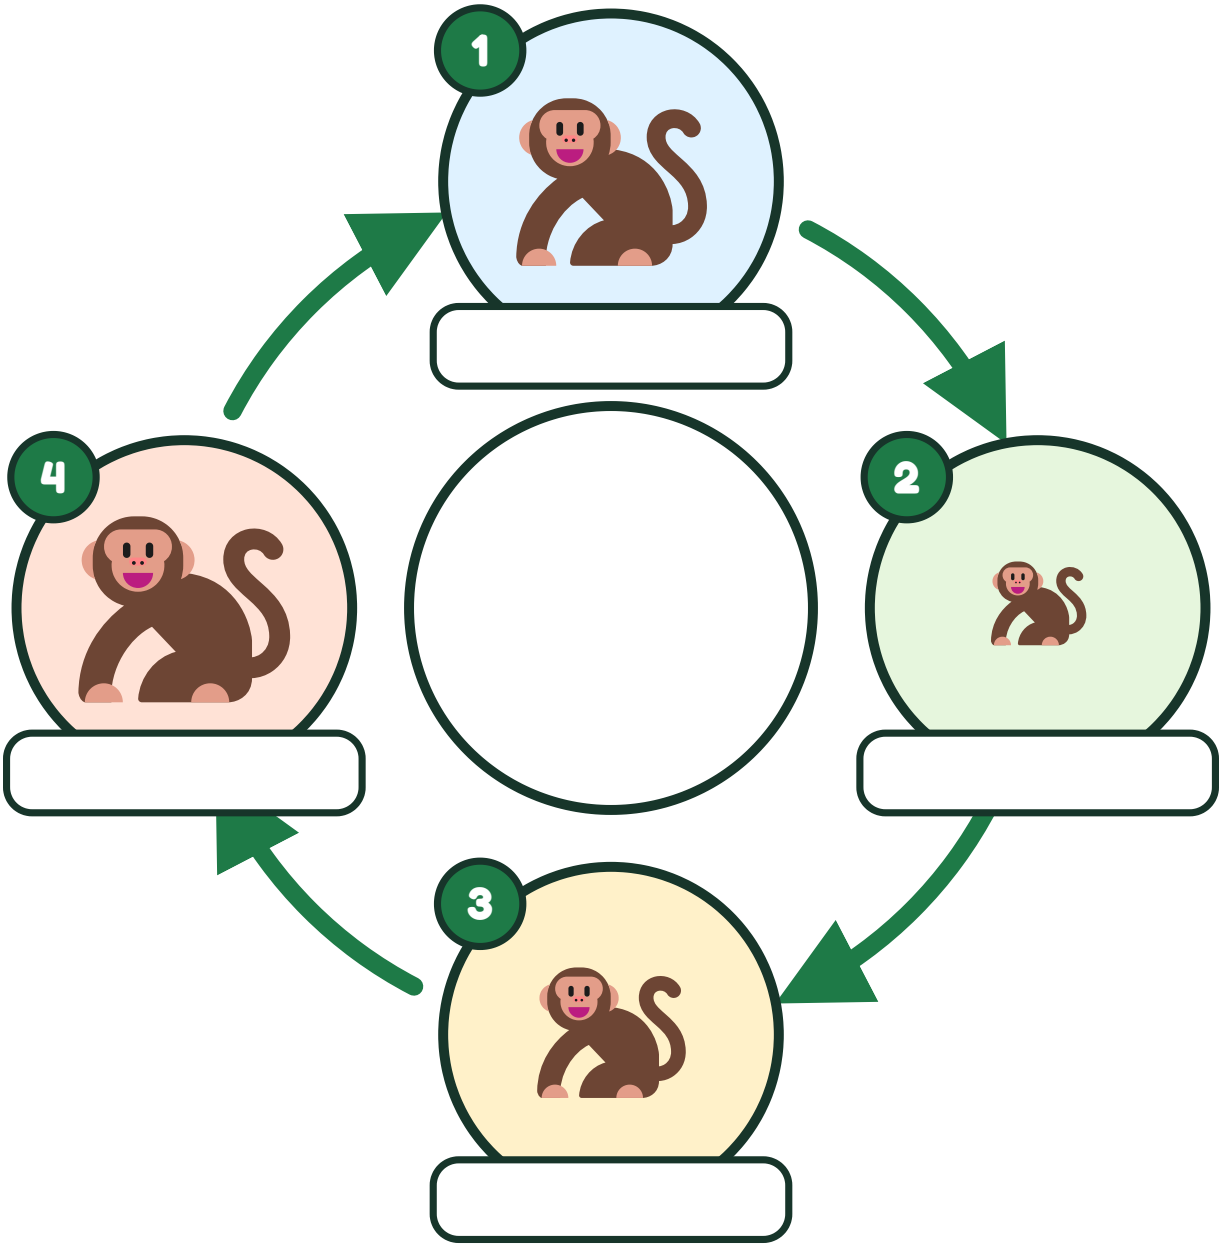
Label the Monkey Life Cycle

Write the name of each stage in the empty boxes.

Name: _____ Date: _____



Word bank

Adult • Infant • Juvenile • Pregnancy

Which stage comes right after **Pregnancy**? _____

Cut and Sequence

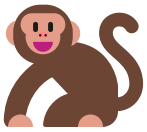
Cut out the cards and put the monkey life cycle in order. ✂

Name: _____ Date: _____

Pregnancy
Mother carries one baby for about 5.5 months.

Juvenile
Weaned by about 1 year; plays in the troop.

Infant
About 1 lb at birth; clings to mom's belly.



Adult
Females breed at 3; young males change troops.

Match the word to its meaning

1. infant ____	A. a baby monkey
2. juvenile ____	B. a young monkey that is no longer a baby but is not grown up
3. troop ____	C. when a young mammal stops drinking its mother's milk
4. weaning ____	D. a group of monkeys that live together

Glue your cards in order on another sheet and draw arrows between them.
