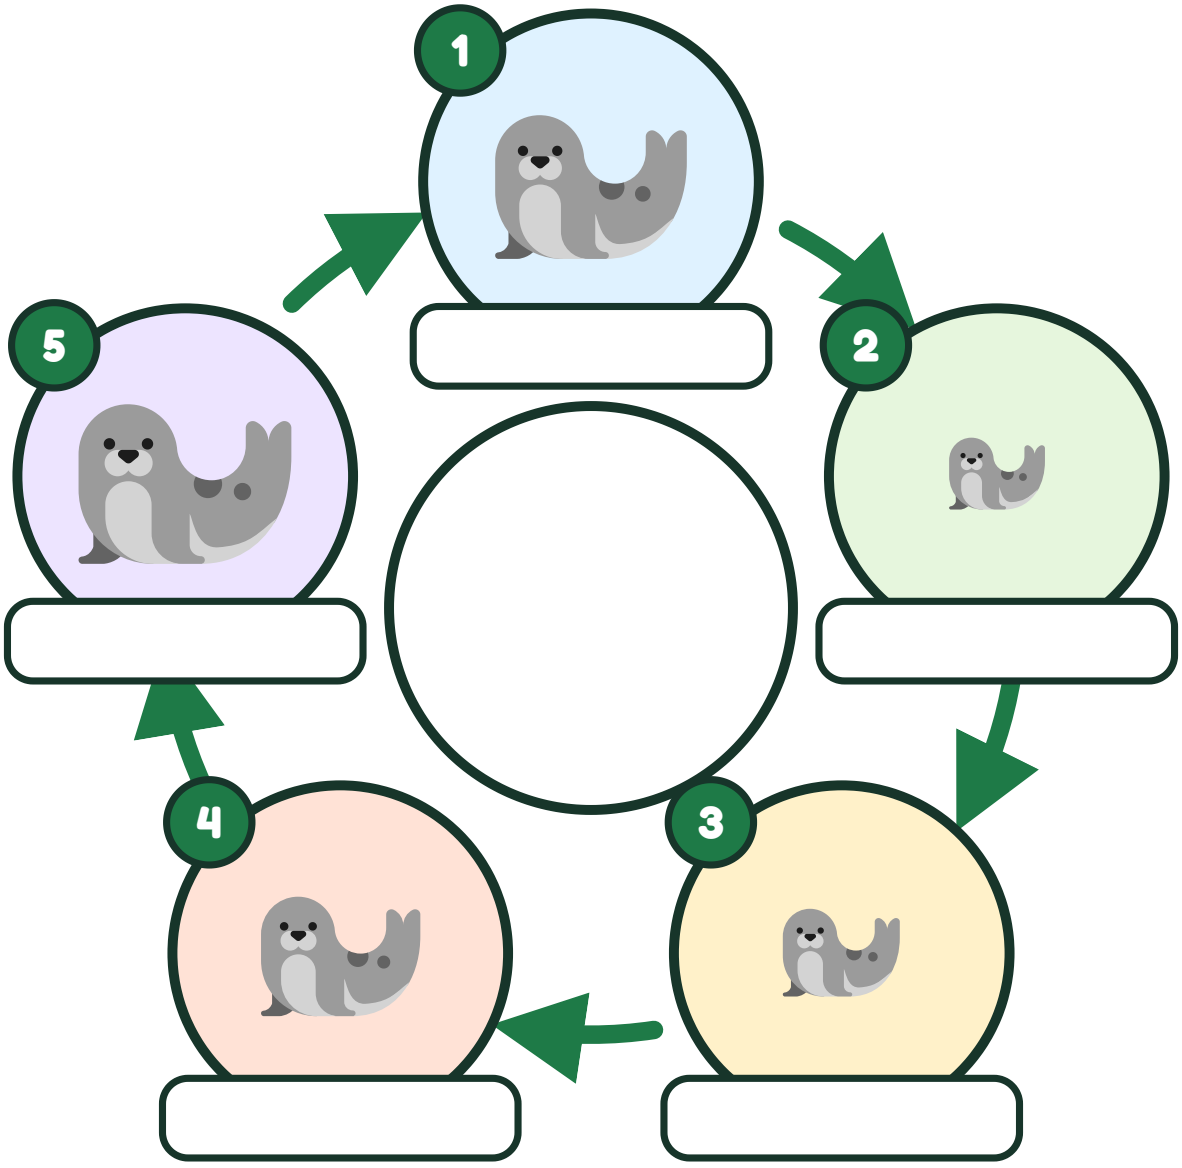
Label the Seal Life Cycle

Write the name of each stage in the empty boxes.

Name: _____ Date: _____



Word bank

Adult • Juvenile • Newborn pup • Nursing pup • Pregnancy

Which stage comes right after **Pregnancy**? _____

Cut and Sequence

Cut out the cards and put the seal life cycle in order. ✂

Name: _____ Date: _____

Nursing pup
Drinks fat-rich milk for about 4–6 weeks.

Pregnancy
About 10 months, including a 2-month pause.

Juvenile
Weaned, alone, and learning to catch fish.

Adult
Breeds from about 3–7 years old.

Newborn pup
Born on land or ice; can swim within minutes.

Match the word to its meaning

1. pup ____	A. a baby seal
2. blubber ____	B. when a tiny embryo pauses before it starts to grow
3. lanugo ____	C. soft, fluffy baby fur; many seal pups are born with white lanugo
4. delayed implantation ____	D. a thick layer of fat that keeps a seal warm

Glue your cards in order on another sheet and draw arrows between them.
